Wattle Farm can also arrange for motel accommodation for those travelling long distance to our sale.

**PLEASE BRING THIS CATALOGUE
TO THE SALE.**

WATTLE FARM BORDERS

Dear Fellow Sheep Breeders,

We are proud of the quality of Rams and Ewes we will present for sale. They are backed by 19 years of stud breeding experience.

This year we will continue to offer all of our stud rams at our annual sale. We believe that this year's catalogue of rams is the best and most even group Wattle Farm has ever offered.

The quality of the rams on offer continues through right to the last lot.

We invite your inspection and encourage your feedback and honest assessment of our Wattle Farm Border Leicesters. We look forward to catching up with you and answering any queries you may have on our stock. **Wattle Farm is a proud member of Sheep Genetics Australia.**

Sincerely

The Satton Family

WATTLE FARM'S HEALTH STATUS

At Wattle Farm we pay particular attention to detail when it comes to the health of our stock we ensure we follow criteria including:

- **Registered Flock 4714**
- **PIC number is NA 552894**
- **Health Status MN3V - NS77053**
- **We are Brucellosis accredited free flock (Certificate no. 76735).**
- **All Sheep at Wattle Farm are Gudair vaccinated against OJD.**
- **Vaccinated with 7 in 1 at marking, weaning and just before sale (Glanery 7 in 1 B12).**
- **Wattle Farm remain committed to the Market Assurance Program.**
- **Progeny are micron tested.**
- **Progeny all brass tagged and NLIS electronic flexi tagged maintaining livestock traceability.**
- **Wattle Farm stud stock is professionally tested on a routine basis by way of faecal sampling for worm burden counts.**
- **Stud stock is routinely weighed using the Breed Elite weighing and drafting set up and software programs.**
- **All sheep are routinely inspected and are foot rot free.**
- **Quality genetics are used from proven Sire lines.**
- **Wattle Farm complies with Animal Health Statements for the sale of our sheep so buyers can maintain confidence and details of their purchases.**
- **All fences at Wattle Farm are constantly inspected and are in quality condition.**
- **All sheep are routinely inspected and monitored.**
- **All transport trailers are properly cleaned routinely.**
- **All sheep routinely drenched.**
- **Flock rams shorn and drenched on the Saturday 29/07/2024.**
- **Treatment with Average Plus Fly at shearing.**
- **Stud Ewes shorn 29th July 2024 and backlined.**
- **We performance test our Border Leicesters using sheep genetics approved scanning.**
- **To ensure the highest possible standards we cull heavily to make sure only the best breeding stock is retained.**

BUYING RAMS, HOW DO THEY MEASURE UP ?

Imagine walking into a supermarket and all the items on the shelf are not labelled. Without accurate and precise labelling, it's pretty well impossible to tell the difference between the items displayed for sale.

The same is true about buying stud sheep. Both rams and ewes contain genetic material which you aim to use to improve your flock. The rams you buy typically determine 90% or more of the genetic gain in your flock moving forward.

To ensure your breeding objectives are maintained and improved we offer the following advice to our clients.

BREEDING OBJECTIVES:

At Wattle Farm Border Leicester Stud our aims remain-

- Breeding true to Border Leicester Sheep
- Maintaining Constitution
- Improving carcase traits by proper measurement
- Improving micron results across the flock by micron testing
- Improving profitability for all our clients.
- Lowering of worm burden(s) by routine testing

SELECTING OUR SIRES:

At Wattle Farm Border Leicester Stud we select our Sire Rams based on-

- By measured performance data and economic traits
- Trueness to type
- Micron Data
- Pedigree data
- Health Status

BENCHMARKING:

At Wattle Farm Border Leicester Stud we benchmark our stud flock against other flocks by-

- Sheep Genetics selection index (ASBV's)
- Micron testing is completed by Riverina Wool Testers on the entire drop.
- Ram trial results
- Rigorous Health Testing through the Market Assurance Plan
- Pedigree matching of the drop.
- Routine testing of weights
- Worm Burden testing

GENERAL INFORMATION-

At Wattle farm Border Leicester Stud we provide the following information-

- The progeny offered at our Annual sales are not more than 8 weeks apart from oldest to youngest.
- Rams are generally kept running in the same mob for their management from weaning to annual sale selection.
- Lambplan data is collected in May/June annually for the drop and takes into account birth dates, birth types, sires and dams details etc.
- Rams for our Annual sale are selected 5 to 7 days prior to sale date and are graded on the characteristics as listed.
- Ewes for our Annual Sale are selected 6 weeks before sale date and are graded on the characteristics as listed.

Wattle Farm Rams and Ewes continue to offer value for money for all our clients which will maintain profitability in your flock.

NSW Ovine Brucellosis Accreditation Scheme

Certificate of Accreditation

CERTIFICATE NUMBER	76735
STUD NAME/PROPERTY	Jeff Sutton Pastoral
ADDRESS	Jeff Sutton Pastoral, 1064 Glynburn Rd, TEMORA, NSW 2666
OWNER	SUTTON Jeffrey Clifford
ACCREDITATION	OB-TR
EXPIRY DATE	31/12/2024

I certify that this flock is accredited in the NSW Ovine Brucellosis Accreditation Scheme.

Accreditation does not provide a guarantee that the flock is free from Ovine Brucellosis. It is a statement that, on the basis of property inspection, sheep examination and testing, and agreement by the flock owner to comply with the rules of the Scheme, no evidence of Ovine Brucellosis has been detected in sheep on the property. This certificate may be cancelled at any time should there be any breach of the owner agreement or if Ovine Brucellosis is suspected or confirmed in any of the flock on the property.

Veterinarian's name: **Dr Lydia Herbert**

Veterinarian's address: HERBERT Lydia 355 Macquarie Street, DUBBO, NSW 2830

Signature of Approved Veterinarian: 

Date: 31/5/22

FLOCK STATUS CERTIFICATE

FLOCK STATUS CERTIFICATE

Australian Johne's Disease Market Assurance Program for Sheep

CERTIFICATE No. NS77053

I certify that the sheep flock owned by:

SUTTON Jeffrey Clifford

TEMORA

and run on the property: **Jeff Sutton Pastoral**

at: **1064 Glynburn Rd, TEMORA, NSW 2666**

and which has been assigned the property identification code (PIC): **NA558924**.

has satisfied the testing criteria and continues to meet the management standard required by the program.

A Flock Status of: **MN3-V**

was assigned in **2023**

This status is valid until **31/12/2024**

Veterinarian's name **Lydia Herbert**

Veterinarian's address: **355 Macquarie Street, DUBBO, NSW 2830**

Signature of Approved Veterinarian: 

Date: **3/1/23**

This certificate will be withdrawn if there is evidence of disease on the property or if the flock owner does not comply with the conditions of the Australian Johne's Disease Market Assurance Program for sheep.

SECTION A – Biosecurity Information

- All consigned sheep are from a Livestock Production Assurance (LPA) accredited property?* Y N
- The number of different sources of sheep that have been introduced onto the consignment property in the last 5 years is:
0 (closed flock) 1-5 6+ Rams Only

SECTION B – Animal Health Information

- All consigned sheep are from a flock that is free of virulent footrot?* Y N
- All consigned sheep are from a flock that is free of benign footrot or scald?* Y N
If (N) please provide further information below
- All consigned sheep are from a flock that is free of lice?* Y N
- All consigned sheep are from a flock in an ovine brucellosis accreditation scheme? Y N
If Yes, Flock Accreditation No. (except Qld) 76735 Expiry Date 31 / 12 / 24
- All consigned sheep are Johne's disease (JD) Approved Vaccinates?* Y N
If Yes, I have been continuously vaccinating all retained lambs in the consignment flock against JD for 17 years. (Vendor-bred sheep only)
- All consigned sheep are from a SheepMAP flock?* Y N
If Yes, Status MNV3 Year commenced 2019 Certificate Number NS77053
**See explanatory notes on back page for further information*
- All consigned sheep are from a flock with a negative test for JD?* Y N
If Yes, which test? MNV3 Faecal Testing Date of test 01 / 12 / 23
- Any other JD management practices carried out on the property?
Yes as per the Procedures Manual for the MAP Scheme
- Any other relevant health information
All Sheep Vaccinated with Gudair

SECTION C – Treatment Information of Consigned Sheep

Treatment type	Product	Date of last treatment
External Parasite Treatment	Eridicator	24-Jul-24
Internal Parasite Treatment	Tridectin	24-Jul-24
Other treatments		
Vaccination (other than JD)	6 in 1 x 3	01-Dec-23

Completed AS per NSIS (DOCUMENT TYPE) (NUMBER) (OFFICE OF ISSUE) (EXPIRY DATE) /20

1 Have these sheep or lambs been raised consistent with the rules of an independently audited QA program on the property the PIC of which is shown above?
Yes No If Yes, give details: MAP - MN3 (NAME OF PROGRAM) NS 77053 (ACCREDITATION OR LICENSE NO.)

2 Have all the sheep or lambs in this consignment been treated with a Scabby Mouth Vaccination either at marking or at least 14 days prior to their presentation for sale?
Yes No

3 Were all of these sheep or lambs bred by the owner or vendor?
Yes No If No, how long ago were the sheep or lambs obtained or purchased?
(If purchased at different times, tick the box corresponding to the time of the most recent purchase.)
A. Less than 2 months B. 2-6 months C. 6-12 months D. more than 12 months

4 Are any of the sheep or lambs in this consignment still within a Withholding Period (WHP) or Export Slaughter Interval (ESI) as set by APVMA or SAFEMEAT, following treatment with any veterinary drug or chemical?

Yes No If Yes, give details: (Record additional details in question 7)

CHEMICAL PRODUCT _____ DATE APPLIED ____/____/20 _____ WHP _____ ESI (IF SET) _____

5 In the past 60 days, have any of the sheep or lambs in this consignment consumed any material that was still within a withholding period when harvested, collected or first grazed?

Yes No If Yes, give details:

CHEMICAL PRODUCT _____ DATE APPLIED ____/____/20 _____ GRAZING WHP _____ DATE FIRST FED/GRAZED ____/____/20 _____ DATE FEEDING/GRAZING CEASED ____/____/20 _____

6 Have the sheep or lambs in this consignment ever in their lives been fed feed containing animal fats? (See Explanatory Notes)

Yes No

7 Please include any additional information below

eg: vaccination programs, animal health certification, additional declarations, etc.

Antibiotic free
Drenched with Tridectan.

UNDERSTANDING LAMBPLAN MATERNAL ASBVS

BWT: Birth Weight (kg) - Rams with more negative BWT ASBVs produce lambs which are lighter at birth.
(BWT ASBVs estimate the genetic difference between animals in live weight at birth)

PWT: Post Weaning Weight (kg) - Rams with more positive WT ASBVs produce progeny that grow quicker and are heavier at a certain age, WT ASBVs are reported at weaning (WWT), post weaning (PWT), yearling (YWT), hogget (WT ASBVs estimate the genetic difference between animals in live weight at a given age)

PFAT: Post Weaning Fat Depth (mm) - Rams with more negative FAT ASBVs produce progeny that are leaner. FAT is reported at post weaning (PFAT), yearling (YFAT) and hogget (HFAT) ages.
(FAT ASBVs estimates the genetic difference between animals in GR fat depth)

PEMD: Post Weaning Eye Muscle Depth (mm) - Rams with more positive ASBVs for EMD will produce progeny that have more muscle, independent of weight, and a higher lean meat yield. EMD is reported at post weaning (PEMD), yearling (YEMD) and hogget (HEMD) ages.
(EMD ASBVs estimate the genetic difference between animals in eye muscle depth at the C site)

NLW: Number of Lambs Weaned (%) - Rams with more positive NLW ASBVs will sire daughters that wean a higher percentage of lambs.
(NLW ASBVs estimate the genetic difference between animals for the number of lambs weaned at each lambing opportunity)

BLX: Border Leicester Cross Index - The BLX index is for a first cross operation where maternal sires are joined to Merino dams, with the first cross female offspring then used in prime lamb systems joined to terminal sire rams. The index favours high early growth animals with good reproduction.

UNDERSTANDING THE TRAITS IN THE CATALOGUE (ASBVS)

All Australian Sheep Breeding Values (ASBVs) used in this catalogue are based on the Sheep Genetics Australia Lambplan Maternal analysis.

Abbreviation	Trait	Units	Description
BWT	Birth weight	kg	Genetic difference in liveweight at birth
MWWT	Maternal weaning weight	kg	Estimate of female progeny's ability to provide a good maternal environment
PWT	Post weaning weight	kg	Genetic difference in live weight gain between weaning and 10 months of age (growth)
PFAT	Post weaning fat depth	mm	Genetic difference in fat depth at 10 months of age
PEMD	Post weaning eye muscle depth	mm	Genetic difference in eye muscle depth at the join at 10 months of age
NLW	Number of Lambs weaned	%	Estimates the genetic difference female progeny of a ram for the number of lambs weaned
BLX	Border Leicester Crossing Index		Indicates the relative value of an animal based on its suitability for first cross ewe and wther production
ACC	Accuracies	%	Are a reflection on the amount and quality of information available used to calculate ASBVs for each animal. Accuracies are important but are more relevant to people purchasing stud rams.

Indexes please visit www.genetics.mla.com.au

**WATTLE FARM BORDER LEICESTER STUD
THIRTEENTH PRODUCTION SALE 2024
7 SELECTED STUD RAMS**

Wattle Farm is offering Ram Fertility examinations through Apiam Genetics. To ensure warranty and due diligence on our part, any sire(s) purchased from Wattle Farm for over \$10,000 (plus GST) will be eligible for this professional examination by Apiam Genetics at our cost. If you wish to take up this offer please speak to Jeff Sutton on this matter on the sales completion.

Wattle Farm offers ongoing support to all our clients and a guarantee of soundness, health and fertility for any sheep we sell. We are confident that our sheep are the type that will increase profitability and sustainability of your breeding flock.

For your information please give due consideration to help with the productive life of your purchases:

- Wattle Farm recommends you take out Insurance Cover for your Stud or flock rams for the next 6 months as rams are susceptible to injury and death in this period.
- Your new ram(s) are better placed in a paddock away from other rams and ewes until joining where he can be fed well and looked after right up until joining.
- Lupins are a very good supplement around 6 weeks from joining and a proven method of increasing semen quality semen is manufactured six weeks prior to use.
- Rams tend to work much better with a shorter fleece so shearing should be considered which will consequently limit the potential for flystrike and grass seed issues
- Remember before sending your rams out to work, check teeth, check stones and check feet and make sure all are in excellent order.
- Your new ram is best placed with mature ewes and should not be overworked as he is your investment for future years to come.
- Every time you have your rams in the yards check them thoroughly to ensure a long productive life to get the best out of them.
- Drench your rams and maintain 7 in 1 vaccinations.
- Take care of your Wattle Farm purchases as they will take care of you.

NUTRITIONAL MANAGEMENT OF YOUR NEW RAM

We encourage purchasers of stud and flock rams to discuss the post sale management of your new ram's nutrition with us.

- Should their diet include hay or grain we believe that a protein level should not exceed 12% and a level closer to 10% would be better.
- Good quality cereal have will provide enough roughage especially when a 100 grams of lupins every other day is included in the ration.
- Over feeding with a high protein diet can lead to lower semen quality and can result in infertility which can take at least six weeks and quite often longer to reverse.
- Adequate shade prior to and including mating also assists in maintaining semen quality. An extended period of heat (i.e A week in the high 30s) and also reduce semen quality.
- As well as diet the shedding of stud rams can also provide a risk to semen quality if ventilation is poor and especially if there is a build up of manure below grating. Excessive ammonia buildup has the same effect on semen quality as high protein diets.

Wattle Farm sheep are right for the times providing buyers with confidence because of the high genetic merits of the quality sires we continue to purchase and use.

WATTLE FARM UTILISES THE PROFESSIONAL SERVICES OF FALLS LIVESTOCK TRANSPORT

Falls Livestock Transport has been operating Australia Wide for many years transporting some of the most finest and prestigious livestock around Australia.

FLT are dedicated to meeting the highest level in industry standards as our professional team ensures a dependable quality service every-time.

Our team are professional, presentable and highly experienced in all areas specialising in low stress livestock handling and transport safety and we are a registered COVID safe business and adhere to restrictions and regulations. We pride ourselves on delivering a high level of customer satisfaction every time.

With only the newest and highest standard of equipment our transport fleet sets itself apart from our competitors catering for all jobs
